DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Tuesday, 31 May 2022 at 06:06 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Air pollution levels are forecast to be Low across the UK on Tuesday, with light winds and scattered, locally heavy showers reducing the likelihood of significant build-up of pollutants.

Tomorrow: Widespread Low levels of air pollution are expected during Wednesday across the country. Isolated areas of Moderate pollution are possible, mainly in the north of the UK

Outlook: Drier and warmer conditions for the bulk of the UK from Thursday onwards and easterly winds should increase the risk of elevated levels of air pollution. Although much of the UK is likely see pollution levels remaining Low, some areas of Moderate pollution are expected, mainly in central and southern areas.
